

EXHIBIT A

City of Angels Water System Audit

RFP 10/1 - Scope of Work

1. Evaluate the source, supply, storage, distribution, and staffing level for compliance with CDPH standards.
2. Review existing Operations Plan, Emergency Response Plan, and operating monitoring and reporting procedures for compliance with the permit.
3. Assess the distribution infrastructure to determine the need for equipment and system component replacement and recommend maintenance consistent with industry wide best practices.
4. Review and assess the applicability of the existing Water Master Plan and provide a schedule for updating the Water Master Plan and developing a Capital Improvements Plan for the water system.
5. Prepare a technical memorandum summarizing the findings of the audit and provide options for corrections and improvements to maintain compliance with CDPH standards.
